If "Yes", you must fill out the Addendum to the Site Identification Form: Notification for Managing Hazardous Secondary Material.

**13. Comments**

The US EPA was requested by NJDEP to conduct an investigation at the Superior Barrel and Drum Site after the owner failed to remove containers and secure the property. Upon inspection, EPA found thousands of containers in various states of deterioration with several leaking, bulging, and void of covers. The property was unsecured allowing locals and vagrants access to the building, trailers, and surrounding lands. Stained soils were noticed throughout the property. EPA conducted a removal assessment that was completed in September 2013. Samples collected during the assessment indicated that containers held CERCLA listed hazardous substances. Additionally, hazardous characteristic tests performed in the field indicated that some materials exhibited RCRA characteristics. In September 2013 EPA initiated a Removal Action at the Superior Barrel and Drum Site in efforts to properly dispose of all containers and contents located on-site.

**14. Certification.** I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete.
